ThevoSleepingStar

Bed time

Many children with special needs have sleep disorders or disturbances, affecting parents and other family members. These disorders include: issues with falling asleep and staying asleep, restlessness during sleep, as well as disorientation upon awakening. Sleep disorders affect a child's natural growth and development.

“I was at the end of my rope and burned out emotionally. Nothing really helped. I am so glad that thanks to her ThevoSleepingStar my daughter is more refreshed and relaxed.”

Improved sleep with the Sensory Support Mattress

- ✓ **MiS Micro-Stimulation® supports mobility**
- ✓ **Improves body perception**
- ✓ **Reduces spasms and pain**
- ✓ **Calms the child for restorative sleep**

Cover
removable and easy to clean for optimal hygiene

Wing suspensions
have a positive influence on the children's restless sleep by providing tiny movement impulses

Mattress
is especially tailored for children with special needs to provide comfortable sensation of lying.

Positioning suspension
soft sensation of lying → extended sleep phases
is optimally tailored to the sleep and lying requirements of children with special needs
