

# Convaid Flyer<sup>®</sup>

Lightweight, Modular and Portable  
Tilt-in-Space Wheelchair

 **Convaid**

## Convaid Flyer<sup>®</sup>

The Convaid Flyer is a lightweight, modular and portable wheelchair developed with youth-oriented aesthetics and growth in mind. A width-expandable chair that a child can grow with, the Flyer has a uniquely designed tilt-in-space base that also accepts more complex adaptive seating. The Flyer comes standard with -5° to +40° of tilt, and 30° of back angle adjustment, offers optional recline and a large selection of options and accessories to achieve ideal positioning and support.

The modular design allows for easy removal of the seating module from the mobility base for simple lifting and compact transport. The Flyer seating module has the ability to grow in width from 12" to 16" and seat depth can grow 4", providing therapists and caregivers the convenience and ease of use they desire without sacrificing the seating and positioning needs the user requires.

## Lightweight, Modular and Portable

- **Lightweight, Modular and Portable**  
Removal of the lightweight seating module (16.8 lbs.) from the mobility base assists in easy lifting, transport and storage.
- **Growth-adaptable**  
Seating module can grow 12-16" in width, and 4" in depth; total seat depth range is 11-21".
- **Tilt and Recline**  
Comes standard with 45° of tilt, 80-110° of back angle adjustment and an optional 80-170° of recline.
