

Gazelle PS[™]

Gazelle PS stands for Prone and Supine which means it can be used by children who need to be supported on their fronts or backs. It offers up to 30 degrees of hip abduction in each leg. The Gazelle PS is available in 3 sizes.

PU

FRAME

90° - -15°

0° - 30°

max 80 kg

480 - 650 mm

Tilt vertical-horizontal

The Gazelle PS tilts from vertical to 15° past horizontal. This is an excellent position for respiratory therapy and postural drainage

Compatible accessories

The Gazelle accessories are compatible with all sizes, and are easily fitted and adjusted onto the Gazelle frame

Multi-adjustable foot supports

Ball joints in foot plates allow for positioning and support for almost any ankle/foot placement

Manual leg abduction

Clinical evidence shows that regular standing in abduction can halt and even reverse hip migration in children with Cerebral palsy. Gazelle moves in an anatomically correct motion to help seat the head of the femur into the acetabulum. You can adjust either one or both legs to the optimal angle

Accessories
