Rabbit[®] Up

The Rabbit Up is a truly adaptable stander. It is secure, reliable and adjustable for all standing needs while also offering the independence to explore using the optional driving wheels. The Rabbit Up enables the child to be an active participant whilst stimulating senses and providing the child with more independence.

Highlights about Rabbit Up

Stander and Mobile stander

The Rabbit Up not only meets all your standing needs but also offers its users the freedom and opportunity to explore using the two optional driving wheels, giving additional independence to the child.

Angle adjustable centre bar

The Rabbit Up has two simple, easy to use angle adjustment options: fixed positions and stepless spindle. This makes transfer easier and helps obtain the best possible position for standing and propelling the driving wheels.

Quick release wheels

The two driving wheels are equipped with quick release for easy mounting and dismounting. The wheels are available in a variety of sizes from 22" up to 36" so you can find the perfect fit for the child.

Camber angling

If you choose to use the driving wheels on your Rabbit Up you have the possibility to change the camber angle. This enables an optimum position of the driving wheels, making propelling easier for the child.

Standard

Mobile stander: Frame, center bar, two driving wheels, standard camber angle, four castors, spoke protectors, fixed positions angle adjustment. Standing frame: Frame, center bar, four castors with brakes.

Further measurements at our website
 The Rabbit Up is measured in an upright position, without driving wheels and with the foot plate in lowest position
 *With driving wheels: size 1 with 22", size 2 with 26", size 3 with 32", size 4 with 36" wheels

Nice to know

Rabbit UP offers the child the possibility to independently explore their surroundings by moving around using the optional driving wheels – and maybe even more important to drive away from situations they do not want to participate in.
