

Supine Stander (E430)

Supine Stander

Standing changes how people see and experience the world. Our Supine Standers allow for greater social interaction and involvement in a wide range of therapeutic or recreational activities. Simply being able to interact with peers at eye level can make any activity more rewarding.

Rifton's standers are thoroughly adaptable so you can make standing comfortable for clients with a wide range of capabilities. With posterior and lateral support, the Supine Standers provide maximum stability while allowing partial weight-bearing and freedom of movement.

Find letters of medical necessity and studies on the therapeutic benefits of standing at: www.rifton.com/supinestander

“Superbly adjustable and stable, the Supine Stander is ideal for the classroom. The vertical height adjustment makes transfers easier and provides versatility, adapting to the needs of many different students. And in the stander they're more alert and active.”

Larry Ezzard, CRTS
Past President of Mobility Designs
Atlanta, GA

Why use a Supine Stander?

- **Standing option for medically involved clients:** The firm main board of the Supine Stander allows users with significant musculoskeletal weakness, secondary to prolonged immobilization, the opportunity to be positioned upright. Stability is provided posteriorly, making it a comfortable option for users with tracheotomy.
- **For gradual progression to an upright position:** The Supine Stander is effective for assisting individuals who have been bedridden for a long time to a standing position. The precise angle adjustment makes it ideal for people with orthostatic hypotension to lessen the adverse hemodynamic response from a rapid change in position.
- **Upright interaction:** Users can be at eye-level with their peers, participating in activities and initiating communication.
- **To improve head control:** The head support on the stander can be flipped down to allow the user opportunities to initiate and maintain head control.
- **Easier transfers:** The large Supine Stander provides vertical adjustments of the main board from 21" to 30", making transfers to the stander easier from a wheelchair or bed.

Supine Stander features

The large Supine Stander provides 9" of vertical adjustment in the horizontal position before gradually tilting to upright.

Supported by the hand Anchor, this child is able to participate in activities she enjoys.

This client has advanced so far that the headrest can now be flipped back out of the way.

The Supine Stander stays secure at any angle. Turn the crank to gradually increase weight bearing.

Easy transfers for large clients

The large Supine Stander makes transfers easy. The manual crank raises and lowers the stander from 21" (wheelchair height) to 30" in the horizontal position.

Use the frame's marked calibrations to record and maintain each user's optimal position.

Once upright, the client is on the same level with caregivers and peers and can interact with their environment.

Components

Tray

The tray has a smooth, cleanable surface with rounded corners. Adjust the armrests to change the angle of the tray.

Inside dimensions: 26" x 15"

Additional laterals

Add a pair of additional laterals for extra support. Laterals adjust easily even with the client in the stander.

Sandals and wedges

Sandals and wedges raise heels or toes. Configure them yourself with the unique "stack and latch" feature. For asymmetrical leg lengths, combine two wedges under one sandal.

Small: 3" x 7", **med:** 4" x 9", **large:** 5" x 10½"

Adjustable abduction wedge

The adjustable abduction wedge can be changed from 3½" to 11" in width depending on how much abduction is desired.

Round abductor

The round abductor helps maintain 4" of comfortable knee separation.

Components (continued)

Collar

The collar adds 2" of separation to the round abductor.

(Requires round abductor)

Hand Anchor

The hand Anchor attaches to the tray with a powerful suction cup. With a secure anchor point for one arm, the user can perform tasks more easily with the other arm and hand.

Rifton Anchor family

For more hand/arm support options see pp. 98–101.

2019 order form

Use dimension chart to select appropriate size.

User dimensions (inches)	E420 small	E430 large
Height	30–50	46–72
 <p>Key user dimension: height Select the appropriate stander by the user's overall height. Choose the model that allows for growth.</p> <p>Important: User's weight must not exceed the maximum working load.</p>		
	Item dimensions (inches)	E420 small
Board length and width	53 x 16½	73 x 19
Distance between laterals	7–13	9–16
Height when horizontal	28½	21–30
Height when vertical	54½	74
Base length and width	37½ x 27	46½ x 29½
Max. working load (lbs)	100	250

* **Supine Stander** includes padding, footboard, adjustable armrests, hip strap, chest strap, leg straps, one pair of laterals, one pair of head blocks and double-locking casters.
