

Tricycle

Want to see someone smile? Give them a bike. Everyone loves to cycle, and with a sporty adaptive tricycle from Rifton, everyone can have a set of wheels giving them the freedom to take off and go.

There's hardly a more fun, motivating activity for improving leg strength, balance, fitness and endurance. In addition to the great physical benefits, trike riding encourages socialization and the development of friendships. Clients with special needs zoom around right alongside their peers on a tricycle that's as cool and colorful as anything on the sidewalk.

And of course, our adaptive tricycles are designed to be flexible and adjustable for all ages with no tools required.

“ My student received the trunk support and rear steering bar for his tricycle. He is cognitively impaired and blind, and now he can ride just like other children. The rear steer is fantastic and allows him to ride faster. Now his tricycle allows him to be a part of society and join his peers. ”

Rachel Jodway
Dearborn Public School District, MI

Tricycle (R130)
with trunk support system
and rear steering bar

Tricycle features

All three sizes are available in four colors: red, blue, pink and lime.

With the rear steering bar the caregiver guides from behind, enabling the rider to see ahead.

Transfers are made easy with the low step, flip-away loop handlebar, and removable laterals.

The front guide bar enables interaction between rider and companion.

A great way to exercise!

The stationary stand elevates the back wheels of the tricycle, enabling a client to pedal in place and exercise his lower extremities. As his muscles move through the cycling motions, they are flexed, extended and stretched. Additionally, this client can practice head and trunk control while he pedals in place.

Components

Seats

Choose between two sizes. Both are upholstered for comfort.

Small: 10" wide x 10" long

Large: 16" wide x 12" long

Handlebars

Choose a straight handlebar with handgrips or a padded loop handlebar for extra support.

Trunk support system

The trunk support stabilizes a rider with poor trunk control. The back rest adjusts for height and seat depth, and laterals can be removed for transfer. A butterfly harness provides anterior support.

Size: 14" wide x 15½" high

Backrest pad

For clients who need less support, this simple backrest pad with a security strap gives freedom of movement. An additional backrest pad can be purchased for lower back support.

Headrests

Choose between winged, contoured or flat headrests. They adjust horizontally and vertically for optimal positioning and attach to the trunk support system, tool-free.

Handbrake

The handbrake is standard on the large trike and an option for the medium trike. It attaches anywhere on the padded loop handlebar.

Note: The handbrake must be chosen at the time of the original purchase. It cannot be added later.

Components (continued)

Communication tray

The communication tray is ideal for holding a communication device or other small objects.

Small: 8½" x 12½"

Large: 11½" x 13½"

Max. working load (lbs.) Small: 10 Large: 15

Abductor

The abductor provides comfortable abduction if needed. Just set it in place, tool-free. The two larger sizes are height adjustable with a snap button.

Front guide bar

The front guide bar attaches securely to the handlebar and lets a caregiver guide the tricycle from the front. It enables eye contact between the caregiver and rider.

Rear steering bar

The rear steering bar lets a caregiver guide the tricycle from behind, providing the rider with a feeling of greater independence.

Front pulley

A front pulley maintains a level pedal position for riders whose extreme tone forces the front of the pedal downward.

Stationary stand

The stationary stand converts any Rifton tricycle into a stationary trainer for pedaling practice or rainy-day activity.

Raises rear axle from floor: 6¾", 7¾" or 9"

2019 order form

Use dimension chart to select appropriate size.

User dimensions (inches)	R120 small	R130 medium	R140 large
Inside leg length	17 – 22	22 – 28	25 – 35
 Key user dimension: inside leg length The extended leg should reach from seat to pedal comfortably when both feet and torso are strapped into place. Important: User's weight must not exceed the maximum working load. Rifton tricycles are not intended for clients with strong reflexes or poorly developed trunk balance and head control. Consult your client's therapist before ordering.			
Item dimensions (inches)	R120 small	R130 medium	R140 large
Overall height (at lowest position)	28½	31	36½
Overall length	46	52	65
Overall width	27½	27½	31½
Wheel diameter	13	15	19
Seat center to extended pedal	17 – 22	22 – 28	25 – 35
Seat to top of trunk support	15½ – 22	15½ – 22	15½ – 22
Gear ratio (approximate)	1:1	1:1	1:1
Item weight (lbs)	47	56	65
Distance between trunk laterals	8 – 14	8 – 14	8 – 14
Max. working load (lbs)	150	160	200
